OBJECTIVE

Aspiring developer learning web development through a MERN stack course. Completed the front-end part covering HTML, CSS, and JavaScript. Also completed a course in Figma for UI design. Interested in building simple, responsive websites and improving skills through hands-on practice. Eager to gain real-world experience by working on projects. Open to learning new tools and technologies and committed to continuous improvement as a developer.

PROJECTS

Meloform – Weather and Emotion-Based Music Player (Main Academic Project)

- Built a responsive music player recommending songs based on real-time weather and user emotion from images.
- Used HTML, CSS, Bootstrap, JavaScript for front end and Node.js for backend integration.
- Integrated a deep learning model for facial emotion detection and connected all modules for smooth flow.

RouteSkin – Skincare Routine Finder(Mini Academic Project)

- Developed a skincare suggestion site that provides routines based on user input.
- Designed UI using HTML, CSS, JavaScript and connected it to a PHP backend for dynamic results.

Amazon Home Page Clone (UI Only)

- Recreated the Amazon homepage using HTML and CSS to practice layout structuring and styling.

Spotify UI Clone (UI Only)

- Built a static clone of Spotify’s landing page focusing on layout, spacing, and clean design using HTML and CSS.
